

Our commitment to you.

- As part of the service, no matter which plan you are on, If something goes wrong during the month we will be available to offer advice and if needed, we will come out to inspect the aquarium subject to a nominal charge of £5
- We will provide you with advice on how much and how often to feed your fish.
- Fish supplied by us have been quarantined in our purpose built licensed fish room or sourced from our local trusted suppliers, to ensure that they arrive to you in optimum health.
- We will not supply you with a fish which is not suitable for the aquarium it is intended or if it can't coexist with the existing inhabitants.
- Where possible we will try to re-home a fish which has outgrown its environment.
- Fish are live organisms, as pets, they live in man-made environments which imitate nature. By following our maintenance plan, we anticipate that this micro-ecosystem will stay healthy and balanced. However, despite all efforts fatalities may still occur for which we cannot be liable.

Tank setup:

Let us professionally setup your newly purchased tank and help you build up the healthy bacteria that will help you avoid problems like New tank syndrome etc.

£65 (up to 200 liters)

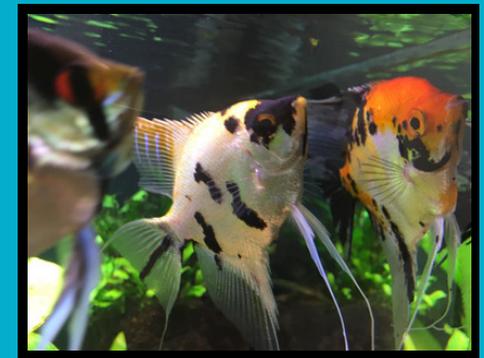

We cover all of Greater Manchester.

For jobs outside M7/M25, there's a surcharge for mileage/travel time.

What the service includes

Basic Service:

Using pre-heated and treated water. Includes health check, gravel vac, glass cleaning and filter maintenance

RO Water:

Basic service plus extra clear, purified water, (contains no phosphate or nitrate which contribute to algae). Includes rowaphos and carbon replacement. (Further reduces algae and improves water clarity).

Ornament cleaning:

Ornaments cleaned like new (off-site) (extra water change on return included)

Planted Tanks:

Basic Service plus pruning plants, removing dead leaves and adding plant fertilizer.

Marine Tanks:

We do not offer a full marine tank service.
We can do water changes/clean the tank, Charged at the Basic Service rate plus £7 per barrel of saltwater. *Saltwater made with Red Sea Salt*

Initial service/one-off cleans:

£35 per hour

Your duty as fish-keepers:

- Feed your fish the amounts recommended. (overfeeding is one of the biggest killers) Dose any fertilizer/CO2 as recommended
- Check the filter and air-pump (where applicable) daily. In case of filter, heater or air pump failure, let us know straight away so that replacements can be supplied as quickly as possible so as not to harm the fish.
- Check your fish daily to ensure that they are not displaying any abnormal behaviour, (e.g. gasping at the surface or uncharacteristically lethargic) or signs of illness.
- If ill health is suspected, please notify us as soon as possible so that measures can be taken before it spreads to the other inhabitants of the aquarium.
- Dead fish should be removed as soon as possible so as not to pollute the water. If you prefer for us to remove the fish please let us know as soon as possible so that we can sort it swiftly.
- Unless otherwise agreed, you allow us to take photos of your aquarium for our portfolio and for advertising purposes.
